PLUG & PLAY

With efficient micro-inverter, we can directly output 230V AC power, which can directly power electrical appliances, or even supply power to the home grid.

place at **Balcony**

BALCONY MAKE FOR YOUR ENERGY

Our balcony system is a photovoltaic system specially designed for balconies, which can turn your balcony into a power station. You only need to hang our self-supporting photovoltaic modules on the balcony, and you can use solar energy to **provide electricity for your home or office**. **Our balcony system is not only easy to install, but also has excellent performance**, which can bring about 1000 kWh of electricity per year, saving your electricity bill and reducing your carbon emissions.

NEW DESIGN WITH HIGH QUALITY

Balcony solar panels are energy-saving and eco-friendly devices that can generate electricity from solar energy on

your balcony. We offer the following benefits:

- Balcony system can save you 20% your electricity bill, reducing your dependence on the main grid.
- Balcony system can reduce your carbon emissions, protecting the earth from climate change and global warming.
- Balcony system can provide you with backup power and convenient electricity, making your life more comfortable and safe.
- Balcony system can enhance your balcony's appearance and value, making your home more modern and stylish.

THE BEST SELLING 800W SYSTEM

400W System Kit

- 1 x 400W+ HJT Glass Glass Module
- 1 x 400W Micro Inverter
- 1 x A/C Cable Kit
- 1 x build-in Mounting System
- 1 x Balcony Install Kit

800W System Kit

- 2 x 400W+ HJT Glass Glass Module
- 1 x 800W Micro Inverter
- 1 x A/C Cable Kit
- 1 x build-in Mounting System
- 2 x Balcony Install Kit
